Colloids and Surfaces, 30 (1988) 414–417
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Adhesion,
Gas-adsorption studies on correlations between the flotability of minerals and the work of water — to their surfaces (wójcik, Bilínski) 275
Adsorption,
Influence of lead ions on the — characteristics of galena in flotation (Popov, Vučinić) 387
Gas — studies on correlations between the flotability of minerals and the work of water adhesion to their surfaces (Wójcik, Bilínski) 275
Modification of substrate surface properties through protein — (Absolom, Neumann) 25
Short term kinetics of polymer — on glass substrate (Somasundaran, Sivakumar) 401
Aggregates,
Highly ordered microstructure of flocculated — (Wong et al.) 355
Aggregative,
Contact interaction between fluid particles in liquid media. 5. Specific interaction between adsorbed layers of macromolecules and criterion of — stability of dispersions (Babak) 307
Air–water interface,
Surface pressure, surface potential and ellipsometric study of cytochrome c binding to dioleoylphosphatidylcholine monolayer at the — (Lamarche et al.) 209
Albumin,
The influence of serum and — on the constant composition growth and surface properties of calcium oxalate monohydrate (Smesko et al.) 361
Bile salt,
The possibility of using — as primary surfactant and cosurfactant in saline water systems (Chiu et al.) 175
Bile salts,
— as biological surfactants (Hofmann, Mysels) 145
Biological surfactants,
A new method to evaluate expansion/compression stress–strain properties of surface films of — (Mautone et al.) 223
Bile salts as — (Hofmann, Mysels) 145
Biosurfactant,
The effect of the monosodium salt of a C_{21} dicarboxylic acid hydrotrope on — bilayers: transdermal delivery considerations (Osborne) 13
Biosurfactants,
Lysophospholipids as — (Stafford, Dennis) 47
Calcium oxalate,
The influence of serum and albumin on the constant composition growth and surface properties of — monohydrate (Smesko et al.) 361
Clay,
Stability of polymer — suspensions. The polyacrylamide–sodium kaolinite system (Nabzar et al.) 345
Coagulation,
The double layer potential ϕ_d as a rate determining factor in the — of electrocratic colloids (Frens, Heuts) 295
Coal,
The effect of ultrasonication on the surface properties, ionic composition and electrophoretic mobility of an aqueous — suspension (Angle et al.) 373
Conduction,
On the concept of percolative — in water-in-oil microemulsions (Mathew et al.) 253
Contact interaction,
— between fluid particles in liquid media. 5. Specific interaction between adsorbed layers of macromolecules and criterion of aggregative stability of dispersions (Babak) 307
Cosurfactant,
The possibility of using bile salt as primary surfactant and — in saline water systems (Chiu et al.) 175
Cytochrome c,
Surface pressure, surface potential and ellipsometric study of — binding to dioleoylphosphatidylcholine monolayer at the air–water interface (Lamarche et al.) 209
Dicarboxylic acid,

The effect of the monosodium salt of a C_{21} — hydrotrope on biosurfactant bilayers: transdermal delivery considerations (Osborne) 13
Dioleoylphosphatidylcholine,
Surface pressure, surface potential and ellipsometric study of cytochrome c binding to — monolayer at the air-water interface (Lamarche et al.) 209
Dipalmitoylphosphatidylcholine,
Determination of the relative molal heat content of — vesicles in various physical states (Kresheck, Long) 133
Double layer potential,
The — ϕ_δ as a rate determining factor in the coagulation of electrocratic colloids (Frens, Heuts) 295
Electrocratic colloids,
The double layer potential ϕ_δ as a rate determining factor in the coagulation of — (Frens, Heuts) 295
Electrolyte solutions,
Interaction of hydrophobized filaments in aqueous — (Rabinovich, Derjaguin) 243
Electrophoretic mobility,
The effect of ultrasonication on the surface properties, ionic composition and — of an aqueous coal suspension (Angle et al.) 373
Ellipsometric,
Surface pressure, surface potential and — study of cytochrome c binding to dioleoylphosphatidylcholine monolayer at the air-water interface (Lamarche et al.) 209
Enzymology,
Research report on proteins in reverse micelles. Structural aspects and — (Magid et al.) 193
Expansion/compression,
A new method to evaluate — stress-strain properties of surface films of biological surfactants (Mautone et al.) 223
Fatty acids,
FT-IR spectroscopic studies on interactions of — in solution and on a salt surface (Ganguly, Mohan) 287
Flocculated aggregates,
Highly ordered microstructure of — (Wong et al.) 355
Flotability,
Gas-adsorption studies on correlations between the — of minerals and the work of water adhesion to their surfaces (Wójcik, Bilínski) 275
Flotation,
Influence of lead ions on the adsorption characteristics of galena in — (Popov, Vučinić) 387
Fluid particles,
Contact interaction between — in liquid media. 5. Specific interaction between adsorbed layers of macromolecules and criterion of aggregative stability of dispersions (Babak) 307
FT-IR,
— spectroscopic studies on interactions of fatty acids in solution and on a salt surface (Ganguly, Mohan) 287
Galena
Influence of lead ions on the adsorption characteristics of — in flotation (Popov, Vučinić) 387
Glass substrate,
Short term kinetics of polymer adsorption on — (Somasundaran, Sivakumar) 401
Growth,
The influence of serum and albumin on the constant composition — and surface properties of calcium oxalate monohydrate (Smesko et al.) 361
n-Hexanol,
Solubilization of — in mixed micelles (Nguyen et al.) 335
Hydrophobized filaments,
Interaction of — in aqueous electrolyte solutions (Rabinovich, Derjaguin) 243
Internal pressure,
On the relation between surface energy, — and molar volume in pure fluids (Vavruch) 405
Ionic composition,
The effect of ultrasonication on the surface properties, — and electrophoretic mobility of an aqueous coal suspension (Angle et al.) 373
Kaolinite,
Stability of polymer–clay suspensions. The polyacrylamide-sodium — system (Nabzar et al.) 345
Kinetics,
Membrane fusion: — and mechanisms (Bentz, Ellens) 65

Short term — of polymer adsorption on glass substrate (Somasundaran, Sivakumar) 401
Lead ions,
Influence of — on the adsorption characteristics of galena in flotation (Popov, Vučinić) 387
Lecithins,
Short-chain —: how to form unilamellar vesicles from micelles and phospholipid multibilayers (Roberts, Gabriel) 113
Liquid media,
Contact interaction between fluid particles in —. 5. Specific interaction between adsorbed layers of macromolecules and criterion of aggregative stability of dispersions (Babak) 307
Lysophospholipids,
— as biosurfactants (Stafford, Dennis) 47
Macromolecules,
Contact interaction between fluid particles in liquid media. 5. Specific interaction between adsorbed layers of — and criterion of aggregative stability of dispersions (Babak) 307
Membrane fusion,
—: kinetics and mechanisms (Bentz, Ellens) 65
Metal,
^{1}H-NMR spectroscopic investigation of reversed micellization in —/organophosphorous surfactant systems (Gaonkar et al.) 265
Micelles,
Short-chain lecithins: how to form unilamellar vesicles from — and phospholipid multibilayers (Roberts, Gabriel) 113
Microstructure,
Highly ordered — of flocculated aggregates (Wong et al.) 355
Minerals,
Gas-adsorption studies on correlations between the flotability of — and the work of water adhesion to their surfaces (Wójcik, Bilínski) 275
Mixed micelles,
Solubilization of n-hexanol in — (Nguyen et al.) 335
Molal heat content,
Determination of the relative — of dipalmitoylphosphatidylcholine vesicles in various physical states (Kresheck, Long) 133
Molar volume,
On the relation between surface energy, internal pressure and — in pure fluids (Vavruch) 405
NMR,
^{1}H — spectroscopic investigation of reversed micellization in metal/organophosphorous surfactant systems (Gaonkar et al.) 265
Organophosphorous surfactant,
^{1}H-NMR spectroscopic investigation of reversed micellization in metal/— systems (Gaonkar et al.) 265
Phospholipid multibilayers,
Short-chain lecithins: how to form unilamellar vesicles from micelles and — (Roberts, Gabriel) 113
Physical states,
Determination of the relative molal heat content of dipalmitoylphosphatidylcholine vesicles in various — (Krescheck, Long) 133
Polyacrylamide,
Stability of polymer-clay suspensions. The —sodium kaolinite system (Nabzar et al.) 345
Polymer adsorption,
Short term kinetics of — on glass substrate (Somasundaran, Sivakumar) 401
Polymer-clay,
Stability of — suspensions. The polyacrylamide-sodium kaolinite system (Nabzar et al.) 345
Primary surfactant,
The possibility of using bile salt as — and cosurfactant in saline water systems (Chiu et al.) 175
Protein,
Modification of substrate surface properties through — adsorption (Absolom, Neumann) 25
Proteins,
Research report on — in reverse micelles. Structural aspects and enzymology (Magid et al.) 193
Reverse micelles,
Research report on proteins in —. Structural aspects and enzymology (Magid et al.) 193

Reversed micellization,
^{1}H-NMR spectroscopic investigation of — in metal/organophosphorous surfactant systems (Gaonkar et al.) 265
Saline water systems,
The possibility of using bile salt as primary surfactant and cosurfactant in — (Chiu et al.) 175
Salt surface,
FT-IR spectroscopic studies on interactions of fatty acids in solution and on a — (Ganguly, Mohan) 287
Serum,
The influence of — and albumin on the constant composition growth and surface properties of calcium oxalate monohydrate (Smesko et al.) 361
Solubilization,
— of n-hexanol in mixed micelles (Nguyen et al.) 335
Stability,
— of polymer-clay suspensions. The polyacrylamide-sodium kaolinite system (Nabzar et al.) 345
Contact interaction between fluid particles in liquid media. 5. Specific interaction between adsorbed layers of macromolecules and criterion of aggregative — of dispersions (Babak) 307
Stratum corneum lipids,
Surfactants and the — (Friberg et al.) 1
Stress-strain,
A new method to evaluate expansion/compression — properties of surface films of biological surfactants (Mautone et al.) 223
Structural aspects,
Research report on proteins in reverse micelles. — and enzymology (Magid et al.) 193
Substrate surface,
Modification of — properties through protein adsorption (Absolom, Neumann) 25
Surface energy,
On the relation between —, internal pressure and molar volume in pure fluids (Vavruch) 405
Surface films,
A new method to evaluate expansion/compression stress-strain properties of — of biological surfactants (Mautone et al.) 223
Surface pressure,
—, surface potential and ellipsometric study of cytochrome c binding to dioleoylphosphatidylcholine monolayer at the air-water interface (Lamarche et al.) 209
Surface properties,
The effect of ultrasonication on the —, ionic composition and electrophoretic mobility of an aqueous coal suspension (Angle et al.) 373
The influence of serum and albumin on the constant composition growth and — of calcium oxalate monohydrate (Smesko et al.) 361
Transdermal delivery,
The effect of the monosodium salt of a C_{21} dicarboxylic acid hydrotrope on biosurfactant bilayers: — considerations (Osborne) 13
Ultrasonication,
The effect of — on the surface properties, ionic composition and electrophoretic mobility of an aqueous coal suspension (Angle et al.) 373
Unilamellar vesicles,
Short-chain lecithins: how to form — from micelles and phospholipid multibilayers (Roberts, Gabriel) 113
Water-in-oil microemulsions,
On the concept of percolative conduction in — (Mathew et al.) 253
